

# CHOOSING an installer

## CHOOSING AN INSTALLER

The quality and durability of the finished product will depend entirely on whether the work has been done properly by a specialist. Thus, choosing an installer is just as important as choosing the right materials.

To help you make a wise choice, here are a number of points to consider when deciding on an installer.

- Does the installer have the necessary experience?
- Can you obtain references from persons for whom recent projects were carried out and can you contact these persons for their opinion of the work done?
- Has a clear, specific plan been drawn up for your project? (You are entitled to ask for photos and samples of the products selected.)
- Will you be provided with a written contract before work begins? (This contract should contain a full description of the work to be done along with a timetable.)
- What kind of guarantee can the installer offer you regarding quality of work?

Feel free to ask all the questions you have.

Taking the time to fill out this form can help ensure a trouble-free installation.

Years of experience: \_\_\_\_\_

Installation guarantee (Nb of years): \_\_\_\_\_
